PROFESSIONAL EXPERIENCE

Associate Software Engineer | Prodapt Solutions Pvt Ltd | Aug 2022 – Present

- **Developed and implemented** new Java functional features in a large-scale enterprise application to improve the application's stability which is consumed by thousands of users.
- **Designed and worked** on testable Java modules, ensuring application reusability and maintainability.
- **Utilized data analysis** to translate business requirements where we contributed to analyzing the reason for customer fallouts and made significant changes.
- **Collaborated with the internal teams** to provide technical support to avoid any downtime for the software and resolved issues related to Java applications.
- **Successfully translated client's requirements** into working solutions that enhanced the product's functionality

PROJECTS

Automation of Data cleaning

- Designed and developed an automation script to streamline the data cleaning process.
- Utilized Spring Security, Spring JPA, SOQL queries and Java 8 features.
- Enhanced data consistency and correctness, reduced errors associated with manual data handling and reduced the time spent on data cleaning duties by 75%.

LUMEN – Service Qualification Engine

- Developed REST APIs to facilitate seamless communication between systems, utilizing Rest Template and Web Client. Utilized tools like JMeter, Spring Security, Spring Batch for application's efficiency
- Written extensive test cases using JUnit and Mockito, enhanced code standards with Sonar Lint.
- Worked with databases including MySQL, Oracle, MongoDB, and H2 to support diverse application requirements.
- Reduced customer fallout rate by 7% through analysis of customer data and subsequent code improvements.

Generative AI Integration for Enhanced Customer Interaction

- Implemented GPT-3.5 Turbo and OpenAI's Whisper AI for the chatbot to significantly improve customer interaction experience.
- Transformed existing fuzzy logic systems using Spring AI to accurately retrieve and validate customer address data.
- Reduced codebase complexity, leading to shorter development times and improved maintainability

CERTIFICATIONS

- GCP certified: Associate Cloud Engineer 2023 – 2026
- JMeter: Performance and Load Testing – LinkedIn Learning
- Spring: Spring Batch – LinkedIn Learning
- Complete Elasticsearch Masterclass with Logstash and Kibana – Udemy
- OpenAI Api & ChatGPT API for developers – Udemy
- MERN Full stack guide – Udemy

SKILLS

- **Programming Languages & Frameworks:** Java, Spring Boot, Spring Security, Spring Batch
- **Databases:** MySQL, Oracle, MongoDB, H2, JDBC
- **API Development:** REST APIs, Rest Template, Web Client
- **UI-tools:** HTML5, CSS3, Angular, JS
- **Microservices:** Development and integration
- **Testing & Quality:** JUnit, Mockito, Selenium, JMeter, JaCoCo, Sonar Lint
- **DevOps & Data Processing:** ELK Stack, GCP
- **Generative AI:** OpenAI's Whisper Api, GPT-3.5 Turbo
- **Version Control:** Git, GitHub

EDUCATION

Easwari Engineering College, Chennai

BE in Mechanical Engineering | Aug 2018 – May 2022
